

Pilgrim Preschool's Policy on Technology for Children

Pilgrim Preschool believes that the children who attend our school benefit the most from frequent, repeated and live forms of social, emotional, physical and educational activities.

Therefore, Pilgrim will limit the use of digital devices, internet and general computer activities.

Use of electronic/digital/computer devices will occur only as an occasional supplement to a teacher's lesson plans.

An example of this: when the teacher has introduced "migration" as a topic, a short 'video' may be played showing geese flying in a V pattern.
